Translating phrases

Match the following.

1)	Three times h less than four		$10 - h^3$
2)	Take away h cube from ten		$4 - 3h$
3)	Five times h		$(h^2 + 1)^3$
4)	Whole cube of the sum of h square and one		$\frac{3}{5}h$
5)	Three-fifth of h		$5h$

Match the following.

1)	$(uv)^4$	v raised to fourth power is added to u
2)	$u(8 - v)$	u multiplied to the difference between 8 and v
3)	$v^4 + u$	u times v whole power four
4)	$3u - 2v$	One increased by product of u and v
5)	$1 + uv$	Thrice of u decreased by twice of v

Answer key   AE:27

Match the following.

1) | Three times h less than four | | $10 - h^3$ |

2) | Take away h cube from ten | | $4 - 3h$ |

3) | Five times h | | $(h^2 + 1)^3$ |

4) | Whole cube of the sum of h square and one | | $\dfrac{3}{5}h$ |

5) | Three-fifth of h | | $5h$ |

Match the following.

1) | $(uv)^4$ | | v raised to fourth power is added to u |

2) | $u(8 - v)$ | | u multiplied to the difference between 8 and v |

3) | $v^4 + u$ | | u times v whole power four |

4) | $3u - 2v$ | | One increased by product of u and v |

5) | $1 + uv$ | | Thrice of u decreased by twice of v |
