

PARTS OF AN ANGLE

Name _____

Score _____

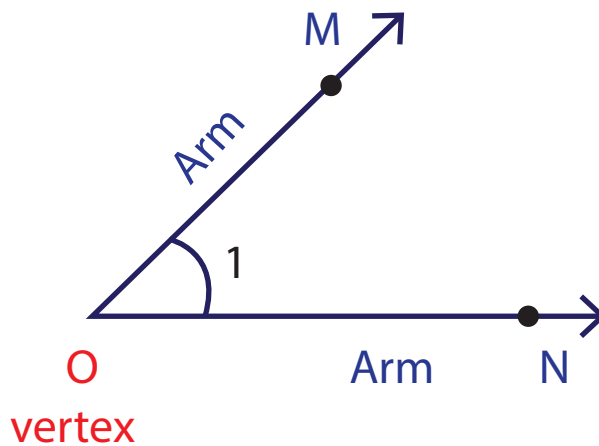

AN:01

When two rays or line segments meet at a point an angle is formed. The meeting point is called the vertex of the angle.

An angle is represented by the symbol \angle .

Angles are measured in degrees, using a protractor.

Two rays or line segments forming the angle are called the arms or sides of the angle.

★ **O is the vertex.**

★ **OM and ON are the arms or sides of the angle.**
