## Different ways to represent an angle

The point where the two rays of an angle meet is called the vertex.

Angle can be named in the following ways:

- ★ Use the uppercase alphabet shown on the figure with the alphabet representing the vertex, always put at the center.

$\angle ABC$  or  $\angle CBA$

- ★ Use the alphabet which is used to represent the vertex,  $\angle B$ .

- ★ Use a number or lower case alphabet.

$\angle 1$  or  $\angle x$
