

## Median of a Triangle

Name \_\_\_\_\_

Score \_\_\_\_\_

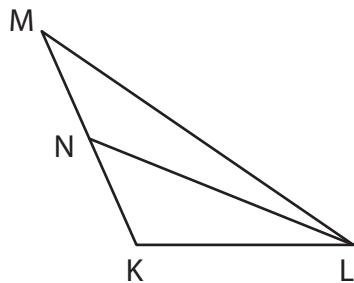

MC:04

- 1)  $\overline{AE}$  is a median of triangle ABC. If  $BE = 4$ , then find

$$BC = \underline{\hspace{2cm}}$$

- 3)  $\overline{LN}$  is a median of triangle KLM. If  $MN = (x - 7)$ ,  $KN = (2x - 17)$ , then find

$$x = \underline{\hspace{2cm}} \quad MN = \underline{\hspace{2cm}}$$

- 5)  $\overline{UV}$  is a median of the triangle STU.

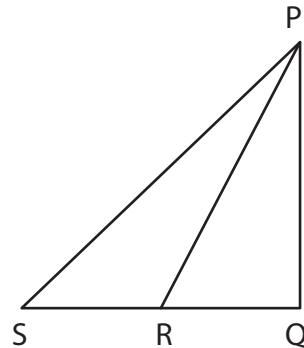

a) If  $TV = 7$ , then  $ST = \underline{\hspace{2cm}}$

b) If  $SV = (2x + 3)$ ,  $TV = (10.5 - x)$

$$x = \underline{\hspace{2cm}}$$

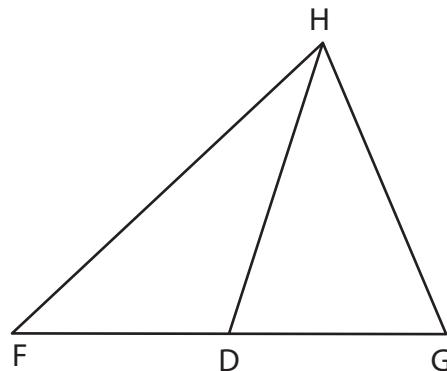

$$SV = \underline{\hspace{2cm}}$$

- 2)  $\overline{PR}$  is a median of triangle PQS. If  $QR = 3.2$ , then find

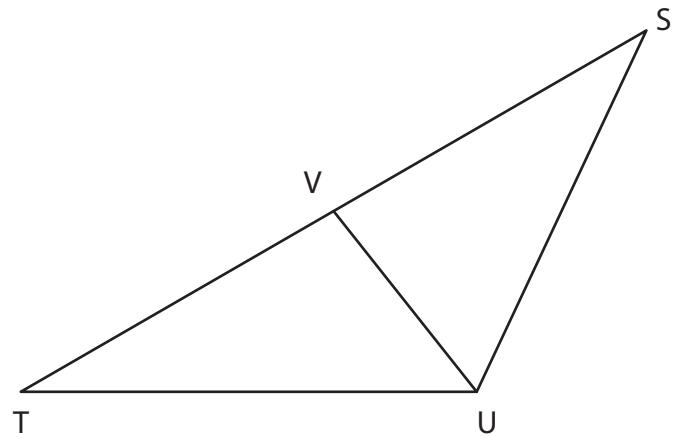

$$SR = \underline{\hspace{2cm}}$$

- 4)  $\overline{HD}$  is a median of triangle FGH. If  $GD = (x + 4)$ ,  $FD = 5$ , then find

$$x = \underline{\hspace{2cm}} \quad GD = \underline{\hspace{2cm}}$$

## Answer key

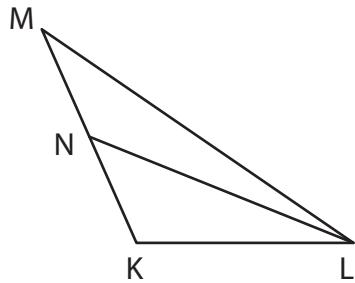

MC:04

- 1)  $\overline{AE}$  is a median of triangle ABC. If  $BE = 4$ , then find

$$BC = \underline{\hspace{2cm}} \quad \text{8}$$

- 3)  $\overline{LN}$  is a median of triangle KLM. If  $MN = (x - 7)$ ,  $KN = (2x - 17)$ , then find

$$x = \underline{\hspace{2cm}} \quad \text{10} \quad MN = \underline{\hspace{2cm}} \quad \text{3}$$

- 5)  $\overline{UV}$  is a median of the triangle STU.

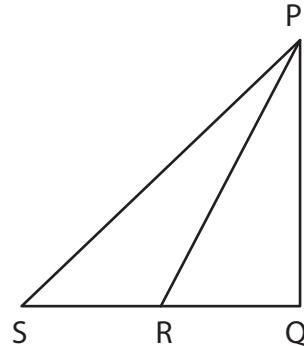

a) If  $TV = 7$ , then  $ST = \underline{\hspace{2cm}}$   $\text{14}$

b) If  $SV = (2x + 3)$ ,  $TV = (10.5 - x)$

$$x = \underline{\hspace{2cm}} \quad \text{2.5}$$

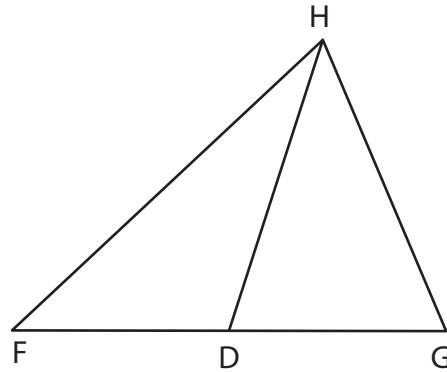

$$SV = \underline{\hspace{2cm}} \quad \text{8}$$

- 2)  $\overline{PR}$  is a median of triangle PQS. If  $QR = 3.2$ , then find

$$SR = \underline{\hspace{2cm}} \quad \text{3.2}$$

- 4)  $\overline{HD}$  is a median of triangle FGH. If  $GD = (x + 4)$ ,  $FD = 5$ , then find

$$x = \underline{\hspace{2cm}} \quad \text{1} \quad GD = \underline{\hspace{2cm}} \quad \text{5}$$
